

Technical Assistance and Support of Child Welfare Initiatives

Imagine a nation where children—all children grow up in a safe stable and loving families, giving them the best possible chance to become healthy, happy and confident adults.

Casey Family Programs is helping to make that vision a reality through our 2020 Strategy—a goal to safely reduce the need for foster care by preventing child abuse and neglect, and finding permanent homes for the nearly half million children in the system.

To assist states in achieving this goal we provide technical assistance and direct support such as:

- Planning and facilitating peer technical assistance with jurisdictions (states, counties, schools or private providers) achieving positive outcomes in your area of interest.
- Establishing partnerships with national experts on topics in Juvenile Justice and Child Welfare to support state and county work efforts. Examples include; Casey Family Programs internal expertise, the Georgetown Crossover Youth Practice Model, Children’s Defense Fund Cradle to Prison Pipeline, The American Bar Association and many others.
- Assistance with planning and facilitating steering committee and workgroup meetings.
- Technical assistance on data analysis and reporting.
